

PRAYER FOR THE ANIMALS IN OUR WORLD

We honour the animals in our world and ask that each one is treated with kindness, respect and compassion

May those who live as pets within a family receive love and attention from those around them, and be provided with a warm, dry, clean place to sleep, adequate food, plenty of fresh water, care, exercise and playfulness to maintain good health, vitality and a calm, satisfied and affectionate temperament

May our competition and working animals find themselves well cared for with owners who understand and provide for all their needs to ensure top performance and a balanced life

May our farmed animals find themselves well cared for with plenty of quality food and water and the attention they need to maintain good health, and be humanely treated at all times

May our wild animals, birds, insects and marine life find a natural harmony in their cycles of life as they all take their part in nature's Divine pattern

May our global human population gain a heightened understanding and education from observing these natural cycles of life on all levels, and practise a new level of harmony in our world today, effecting a new foundation and benefiting the highest good of mankind and humanity

This prayer is said with the highest levels of love, sincerity and integrity

In Love, and Light and Healing
VANESSA

These words were originally gifted through me during August 2010 after initial inspiration by Tina Read
(www.animaltranquillity.co.uk)

Please freely share them around our world

Special thanks to all those close to me who have helped inspire this work on all dimensions
